EDUCATION

Graphic Era Hill University

2022 – Present

B.Tech - Computer Science and Engineering - CGPA - 8.2

Dehradun, Uttarakhand

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Computer Networks
- Artificial Intelligence
- Web Development
- Operating Systems
- Database Management System (DBMS)
- Object Oriented Programming
- Cloud Computing

PROJECTS

AI-Driven Cloud Cost Optimization System 🗒 | [Azure](#)

2024–2025

- Implemented an AI-driven cost optimization system leveraging **Azure Copilot** and **Azure Monitor** to reduce cloud spend by 20–30%.
- Developed **PowerShell runbooks** in **Azure Automation** to right-size VMs and optimize infrastructure usage.
- Integrated **Azure Advisor**, **Azure Cost Management**, and anomaly detection alerts into a closed-loop optimization pipeline.
- Built automated workflows with **Azure Logic Apps** for proactive remediation and FinOps-aligned governance.

Phishing Detection 🗒 | Python, Numpy, Pandas, Scikit-learn, XGBoost, Keras, TensorFlow

2023–2024

- Developed a machine learning project to detect phishing websites using features extracted from URLs and webpage content.
- Collected and preprocessed datasets containing 10,000 URLs (5,000 phishing and 5,000 legitimate).
- Implemented and evaluated classification models including Decision Tree, Random Forest, SVM, XGBoost, and Neural Networks. Achieved **86.4% accuracy** with XGBoost.
- Planned extensions include a browser extension or GUI for real-time URL classification.

E-Commerce Product Recommendation System 🗒 | Pandas, Numpy, Scikit-learn

2023-2024

- Built a machine learning-based recommendation system providing personalized product suggestions using collaborative and content-based filtering.
- Utilized Amazon electronics ratings dataset (user-product interactions) and preprocessed it with unique user/product identifiers to remove bias.
- Implemented Rank-Based, User-Based Collaborative Filtering (Cosine Similarity), and Model-Based Collaborative Filtering (SVD) approaches.
- Achieved accurate and scalable recommendations; evaluated model performance using RMSE for rating prediction accuracy.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, NoSQL

Technologies/Frameworks: Git, GitHub, ReactJS, NextJS, NodeJS, ExpressJS, MongoDB, PostgreSQL, Azure, Azure Virtual Machines, Azure App Services, Azure Blob Storage, Azure SQL Database, Azure Virtual Network, Docker, Kubernetes, Scikit-Learn, TensorFlow

EXTRACURRICULAR

- **Vice President - Innofusion Research Innovation Club** - Spearheaded research initiatives and innovation programs to foster technical growth and collaboration among students.
- **Member of IEEE Student Chapter** - Collaborated on advanced projects and contributed to technical discussions and events.
- **Member of Student Research and Innovation Cell - 3rd International Conference on Futuristic Technologies, Pune, India** - Delivered a presentation on cutting-edge research, showcasing innovation and technical proficiency on a global platform.
